

Rishu Mehra – Technical Writing Portfolio

Bangalore, India | rishu.techwriter@gmail.com | justmyslide.com | rishumehra.github.io/portfolio

About Me

I'm a technical writer with 8+ years of experience creating clear, developer-focused documentation for enterprise software, SaaS platforms, and open-source tools. I've worked with teams at Red Hat, BrowserStack, and Ivanti, contributing to internal knowledge bases, API documentation, SDK guides, and Git-based documentation workflows.

My writing combines clarity, structure, and quick onboarding, troubleshoot confidently, and build with clarity.

Developer Documentation

These examples highlight my focus on developer onboarding, system integration, and technical accuracy across open-source and enterprise platforms. All samples are structured for clarity, version control, and reusability.

Red Hat – OpenShift Application Documentation

Worked on official OpenShift Container Platform documentation, writing user guides for developers building and monitoring applications. Focused on improving clarity and task completion for users accessing the Developer perspective in the OpenShift web console.

Sample links:

- Monitoring Project and Application Metrics:
https://docs.redhat.com/en/documentation/openshift_container_platform/4.7/html/applications/odc-monitoring-project-and-application-metrics-using-developer-perspective
- Building Applications Overview:
https://docs.redhat.com/en/documentation/openshift_container_platform/4.7/html/applications/building-applications-overview

BrowserStack – Selenium and API Docs

Created developer-facing documentation for automation workflows, including Selenium integration and troubleshooting guides. Key contributions include two focused guides on HTTP authentication and header injection for browser automation.

Sample links:

- Basic HTTP Authentication:
<https://www.browserstack.com/docs/automate/selenium/basic-http-authentication>
- Custom Header Injection:
<https://www.browserstack.com/docs/automate/selenium/custom-header>

Ivanti – ITSM Developer and Admin Documentation

Maintained configuration and developer documentation for Ivanti Service Manager (cloud and on-premise). Focused on API usage, function references, and system configuration for ITSM admins and integrators.

Sample links:

- API: GetBusinessObjectMetaData:
https://help.ivanti.com/ht/help/en_US/ISM/2025/admin-user/Content/Configure/API/GetBusinessObjectMetaData.htm
- Function Reference: PromptHtml:
https://help.ivanti.com/ht/help/en_US/ISM/2025/admin-user/Content/Reference/Functions/PromptHtml.htm

Samsung – Tizen Developer Documentation

Created Markdown-based documentation for Tizen multimedia and embedded systems. Authored setup guides, internal developer notes, and feature logs for Samsung Smart TVs and web applications.

Sample links:

- First Samsung TV App:
<https://docs.tizen.org/application/web/get-started/tv/first-samsung-tv-app/>
- Tizen Web Tools Overview:
<https://docs.tizen.org/application/vstools/Tizen/web/>

Community Engagement

GitLab Contribution – Git Documentation

Improved developer onboarding instructions in GitLab's public documentation through open-source contributions.

- Merge Request: https://gitlab.com/gitlab-org/gitlab/-/merge_requests/176521
- Live Page: https://docs.gitlab.com/topics/git/get_started

Tech Writing Resource Hub

Curated a public GitHub page to share Markdown templates, doc style guides, and examples for technical writers.

- <https://rishumehra.github.io/techwriting-resources>
- <https://rishumehra.github.io/Markdown-cheat-sheet-for-UX-Writers>

Markdown Blog Series

Write in-depth blog posts on documentation tools, publishing workflows, and Markdown usage tips at <https://justmyslide.com>

Write the Docs

Active member of Write the Docs - Slack, Bangalore chapter, and virtual meetups.

Skills and Tools

Authoring: Markdown, HTML, YAML, AsciiDoc, MadCap Flare

Platforms: GitHub, Azure DevOps, Confluence, JIRA

Static Site Tools: Jekyll, GitHub Pages

Other: Python (basic), content audits, documentation strategy
